

Database : Mysql

Back End Technology : Node JS, Express JS

Front End Technology : React JS

Database Name : ScrappedData

Tables:

Table Name	MediaScrapper
Column - 1	Id
Column - 2	ImageUrl
Column - 3	ImageName
Column - 4	WebURL
Column - 5	CreatedAt

mysql -u root -h localhost -ppassword --ssl-mode=DISABLED

API Curl :

1) Curl - 1

```
curl --location --request GET 'http://localhost:3002/showMediaScrapperData/0/10/all' \
--header 'adminToken: admin12345'
```

2) Curl - 2

```
curl --location --request POST 'http://localhost:3002/addMediaScrapperData' \
--header 'adminToken: admin12345' \
--header 'Content-Type: application/json' \
--data-raw '{
  "webUrls" : [
    "http://sknau.ac.in"
  ]
}'
```

Backend start Code:

1. Go to backend folder and open terminal
2. Write : npm install
3. Write : node server.js
4. Api Started port at 3002 (Local server URL : <http://localhost:3002/showMediaScrapperData/0/10/all>)

Frontend Start Code:

1. Go to frontend folder and open terminal
2. Write : `npm install`
3. Write : `npm start`
4. Open Url at : `http://localhost:3000`
